

*Studded Winter Tire for
Ice and Snow Rally*

Giti Compete
X-GRIP

Giti Compete
X-GRIP

Overall Champion in the 2012 Mohe Ice and Snow Cross-Country Rally Championship (Petrol Group)

1 **Unique Compound Formulation**
for **-50°C**
freezing cold

Normal tires are subjected to rubber hardening in cold temperatures starting from 7°C, which results in poor performance and compromises safety. *GitiCompete X-GRIP* utilizes a specialized formulation that enable excellent performance even at -50°C.

2 **Optimized Tire Section Width**

The right overall section width allows for effective slashing through ice and snow, creating better handling and maneuvering response without compromising traction.

3 **Strengthened Anti-Cut Sidewall**

Reinforced sidewall protects from unforeseen dangers

Safety must never be compromised. A reinforced anti-cut sidewall prevents punctures from flying icicles.

4 **Superb Grip and Uncompromised Handling**

- Special rib design maximizes cornering and ice traction
- Over 400 studs ensure maximum grip on ice and snow

5 **Permanently In-cured Studs**

Studs tend to separate from the tire in harsh icy and snowy conditions. Giti R&D has developed a technique to affix every stud permanently during the vulcanization process to ensure the studs remain intact during competition.

Available Sizes

| Tire Size | Tread Depth (mm) | Rim Width Range (inches) | Number of Studs |
|------------|------------------|--------------------------|-----------------|
| 215/50R17 | 12.0 | 6.5 - 7.5 | <400 |
| 220/750-16 | 13.2 | 6.5 | 480 |
| 145/80R16 | 12.0 | 5.0 - 6.0 | <400 |
| 205/65R15 | 12.0 | 5.5 - 6.5 | <400 |
